Activity

The Technical Assessment Unit of the Road and Bridge Research Institute operates in the following areas:

- a) [national technical assessments](#) ;
- b) [European technical assessments](#) ;
- c) [technical recommendations](#) .

In the area of national technical assessments, the Technical Assessment Unit:

- coordinates and supervises the procedures for national technical assessments carried out at IBDiM;
- provides formal support for national technical assessments;
- cooperates with IBDiM technical experts in assessing construction products and developing IBDiM National Technical Assessments;
- prepares IBDiM National Technical Assessments from the formal, legal and editorial side;
- keeps and publishes a register of issued and withdrawn IBDiM National Technical Assessments;
- keeps and publishes a register of granted and withdrawn IBDiM Technical Approvals*;
- monitors the continuous compliance by IBDiM with the requirements for technical assessment bodies in the provisions on construction products;
- participates in the Technical Board for National Technical Assessments.

*) Technical approvals were granted until December 31, 2016 and may be used as national technical assessments until the end of their validity period. From January 1, 2017, the law does not allow the issuance, change or extension of validity dates of technical approvals.

In the area of European technical assessments, the Technical Assessment Unit:

- coordinates and supervises the procedures for European technical assessments (ETA) carried out at IBDiM including the development of European Assessment Documents (EAD);
- provides formal support for European Technical Assessment procedures;
- cooperates with IBDiM technical experts in assessing construction products and developing European technical assessments;
- prepares European Technical Assessments and European Assessment Documents from the formal, legal and editorial side;
- coordinates in IBDiM the EOTA consultation processes regarding ETA and EAD developed by other Technical Assessment Bodies;
- cooperates with the European Organization for Technical Assessment EOTA and other Technical Assessment Bodies;
- participates in the EOTA Technical Board.

In the area of technical recommendations, the Technical Assessment Unit:

- coordinates and supervises the procedures for IBDiM Technical Recommendations;
- provides formal support for IBDiM Technical Recommendations procedures;
- cooperates with IBDiM technical experts in assessing construction products and developing IBDiM Technical Recommendations;
- prepares IBDiM Technical Recommendations from the formal, legal and editorial side;
- keeps and publishes a register of granted and withdrawn IBDiM Technical Recommendations.
