

**NO. 1/2006**

Wojciech Grabowski, Andrzej Pożarycki – Fatigue crack propagation tests and analysis in asphalt pavement model

Jan Kempa – Influence of horizontal curves geometry on driving comfort

Przemysław Mossakowski – Reinforcing bars of polymer composites used in concrete engineering structures

Jerzy Odorowicz – Stability of steel prismatic beam columns in the range of plastic deformation

Damian Bęben, Zbigniew Mańko – Discussion remarks on the paper "Deformations of soil-steel bridges" (DROGI i MOSTY, 2/2005, 91-110)

Czesław Machelski, Bernard Michalski – Authors reply

- [Abstracts of articles](#)

**NO. 2/2006**

Czesław Bajer, Piotr Tokaj – Dynamics of the track with steel wedge-shaped sleepers

Daria Józwiak - Niedźwiedzka – The counteracting of the concrete scaling problem by means of pre-wetted lightweight aggregate  
Part I – State of the art

Józef Judycki – Bases for determination of the equivalent axle load factors for design of road pavements

Instructions to authors

- [Abstracts of articles](#)

**NO. 3/2006**

Zdzisław Cyruliński, Sławomir Drewnowski, Wojciech Marks – The prestressed-expanded beams made of glued wood

Daria Józwiak - Niedźwiedzka – The counteracting of the concrete scaling problem by means of pre-wetted lightweight aggregate  
Part II – Laboratory tests

Christoph Müller – Environmental and technical aspects of the application of blended cements in concrete

Piotr Pszczoła – Low temperature cracking of asphalt layers of pavements

- [Abstracts of articles](#)

**NO. 4/2006**

Zbigniew Cywiński – Formation of new Japanese „ribbon bridges”

Małgorzata J. Glinicka – Geotechnical properties of cohesive soils from Białystok area improved by cement and lime

Czesław Machelski, Grzegorz Głuch, Michał Pigoń – Parametric analysis of three-girder concrete spans

Czesław Machelski, Robert Toczkiwicz – In situ evaluation of connection flexibility in a road bridge due to live loads
