

No. 1/2013

The printed copy of the quarterly journal is the primary one.

- [Full text \(pdf\)](#)

Tomasz Baran, Wojciech Drożdż – Evaluation of properties of domestic calcareous fly ash and its processing methods

- [abstract](#)

Tomasz Baran, Albin Garbacik, Katarzyna Synowiec, Aleksandra Żak – Use of calcareous fly ash as an active constituent of hydraulic road binders

- [abstract](#)

Edmund Czopowski, Beata Łażniewska-Piekarczyk, Barbara Rubińska-Jończy, Janusz Szwabowski – Properties of concretes based on cements containing calcareous fly ash

- [abstract](#)

Mariusz Dąbrowski, Michał A. Glinicki – Air void system parameters and frost resistance of air-entrained concrete containing calcareous fly ash

- [abstract](#)

Damian Dziuk, Zbigniew Giergiczny, Albin Garbacik – Calcareous fly ash as a main constituent

of common cements

- [abstract](#)

Zbigniew Giergiczny, Albin Garbacik, Mikołaj Ostrowski – Pozzolanic and hydraulic activity of calcareous fly ash

- [abstract](#)

Zbigniew Giergiczny, Katarzyna Synowiec, Aleksandra Żak – Suitability evaluation of calcareous fly ash as an active mineral additive to concrete

- [abstract](#)

Jacek Gołaszewski, Aleksandra Kostrzanowska, Tomasz Ponikiewski, Galina Antonowicz – Influence of calcareous fly ash on rheological properties of cement pastes and mortars

- [abstract](#)

Grzegorz Knor, Michał A. Glinicki, Jan Holnicki-Szulc, Andrzej Ossowski, Zbigniew Ranachowski – Influence of calcareous fly ash on the temperature of concrete in massive elements during the first 72 hours of hardening

- [abstract](#)

No. 2/2013

The printed copy of the quarterly journal is the primary one.

- [Full text \(pdf\)](#)

Monika Dąbrowska, Zbigniew Giergiczny – Chemical resistance of mortars made of cements with calcareous fly ash

- [abstract](#)

Wojciech Drożdż, Zbigniew Giergiczny – The resistance of mortars and concrete with calcareous fly ash on alkaline corrosion

- [abstract](#)

Karolina Gibas, Michał A. Glinicki, Grzegorz Nowowiejski – Evaluation of impermeability of concrete containing calcareous fly ash in respect to environmental media

- [abstract](#)

Michał A. Glinicki, Róża Krzywobłocka-Laurów, Zbigniew Ranachowski, Mariusz Dąbrowski, Jolanta Wołowicz – Microstructure analysis of concrete modified with addition of calcareous fly ash

- [abstract](#)

Jacek Gołaszewski, Aleksandra Kostrzanowska, Patrycja Miera, Michał Drewniok, Grzegorz Cygan, Joanna Deszcz – Admixtures effectiveness in mortars in the presence of calcareous fly ash

- [abstract](#)

Jacek Gołaszewski, Tomasz Ponikiewski – The effect of calcareous fly ash on selected properties of new generation of concrete

- [abstract](#)

Daria Józwiak-Niedźwiedzka, Maciej Sobczak, Karolina Gibas – Carbonation of concretes containing calcareous fly ashes

- [abstract](#)

Andrzej Śliwka, Katarzyna Domagała, Adam Zybura – Evaluation of protective properties of concretes made of cements with calcareous fly ash with respect to reinforcing steel

- [abstract](#)

No. 3/2013

The printed copy of the quarterly journal is the primary one.

- [Full text \(pdf\)](#)

Damian Bęben – Evaluation of backfill corrosivity around steel road culverts

- [abstract](#)

Bartłomiej Krawczyk, Antoni Szydło – Identification of homogeneous pavement sections

- [abstract](#)

Bartłomiej Kunecki, Leszek Korusiewicz – Field tests of large-span metal arch culvert during backfilling

- [abstract](#)

Tomasz Lipecki, Jarosław Bęc, Andrzej Flaga, Grzegorz Bosak – Aerodynamic analysis of a sinusoidal footbridge for pedestrian and bicycle traffic

- [abstract](#)

Jarosław Zwolski, Jan Bień, Mieszko Kużawa, Paweł Rawa – Dynamic load tests of access ramp to Rędziński Bridge in Wrocław

- [abstract](#)

Informations for Readers and Guidelines for Authors

The printed copy of the quarterly journal is the primary one.

- [Full text \(pdf\)](#)

Jarosław Bęc, Tomasz Lipecki, Andrzej Flaga, Grzegorz Bosak – Model investigations and numerical analysis of an arch shaped footbridge

- [abstract](#)

Marek Iwański, Grzegorz Mazurek – Hydrated lime effect on rutting resistance of SMA pavements

- [abstract](#)

Sławomir Karaś, Andrzej Krasnowski – Adjustment of the existing structures located on the trunk railway line CMK to accommodate high-speed rail (HSR) based on theoretical and experimental analyses

- [abstract](#)

Wojciech Sas, Andrzej Głuchowski – Rutting prediction for stabilized soils based on the cyclic CBR test

- [abstract](#)

Alicja Sołowczuk, Przemysław Gardas – The proposed assessment method of pavement condition at bus bays and bus stops

- [abstract](#)
